

# FIAT SERVICE LETTER

SUBJECT: SPEEDOMETER CONTROL SYSTEM

VEHICLES: 1975/76 - 124 SPORT COUPE, SPIDER, 131 MODELS  
1975/76 - X1/9 MODELS WITH CATALYTIC CONVERTER

## GENERAL INFORMATION:

Since the exhaust recirculation system and/or catalytic converter has been certified for 50,000 miles, the 25,000 mile recorder and maintenance indicators are no longer required. Therefore, if repairs to the two piece speedometer cable control system are necessary, it is suggested the system be simplified by installing a one piece replacement cable and housing.

When this assembly is installed, the existing upper and lower cables, housings and 25,000 mile recorder can be eliminated and removed from the vehicle.

NOTE: The one piece assembly must be properly routed during installation in order to avoid possible kinks and bends.

## PARTS INFORMATION:

The components included in the two piece speedometer cable control system will be available until present parts supply has been exhausted.

The one piece speedometer cable assembly can be ordered using the following part numbers:

<u>Models</u>	<u>Complete Cable Assy.</u>	<u>Inner Cable</u>
X1/9	4266709	4266710
128 Models	4327531	4327532
124 Sp. Coupe	4161435	4141844
124 Spider	4181687	4181688
131 St. Trans.	4338097	4338098
131 Automatic	4338219	4338220
128 Cp. (1975)	4265096	4264559

## WARRANTY INFORMATION:

If a malfunction occurs during the warranty period to either the upper or lower cable, or the 25,000 mile recorder, you

READ, INITIAL AND PASS ON
